The Problem

"Every productivity app told me: just make a list and do it."

If I could just do it... I wouldn't have ADHD.

| The problem isn't making lists. It's actually **DOING** the things on the list.

366M+

Adults with ADHD globally

\$14.3B

Productivity app market 2025

0

Apps combining neuroscience + AI
for ADHD

Our Solution: TaskFlow AI

An AI-powered action driver built on neuroscience research

1
Enter Task
"Study TensorRT"

2
AI Breaks Down
Into actionable steps

3
Focus Mode
Timer + Single task

4
AI Coach
24/7 body doubling

Not another planner. An action driver.

Built on Neuroscience Research

| Visual Timer

Time Blindness - Dr. Barkley (1997)

| AI Body Doubling

Task Initiation - Dr. Ramsay (UPenn)

| Micro-Rewards

Dopamine - Dr. Volkow (NIDA, 2009)

| Focus Mode

Working Memory - Baddeley, Sweller

Powered by Azure AI

Azure OpenAI Service

GPT-4o for intelligent task breakdown

Azure Container Apps

Serverless, auto-scaling deployment

Azure Cosmos DB

Tasks, subtasks, notes, conversations

Zero-friction deployment

Traditional: 4 steps
dockerfile + build + push + deploy

Our way: 1 command
`az containerapp up --source .`

Perfect for ADHD developers: Minimal config. Maximum output.

Community Validation

PRODUCT HUNT

"Seeing no free trial and no login, I immediately thought: This was definitely made by someone with ADHD who truly knows us."

- EK P

LINKEDIN

"How you use AI to break tasks down really resonated with me... integrate with smart calendar could be powerful."

- Pooya Karimian

DCINSIDE (KOREA)

"This idea is really good! I wish this existed years ago..."

Bug reports fixed within hours

USER RESEARCH

"The fundamental missing piece of most to-do systems is that they are not emotionally responsive."

Iterating based on real user feedback, not assumptions

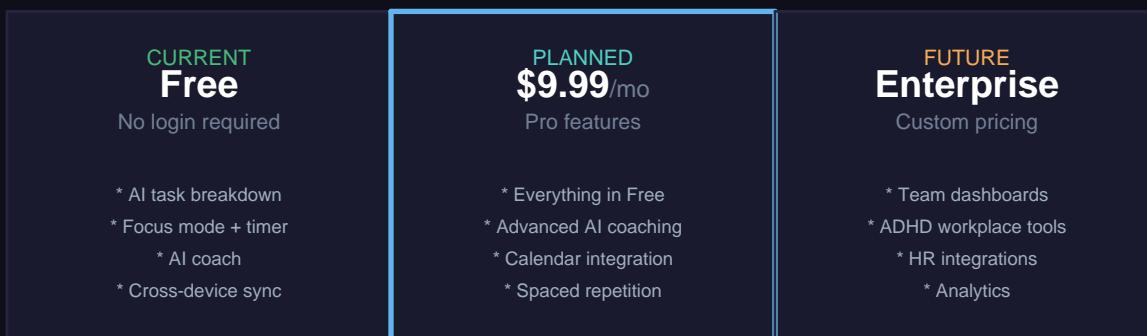

Market Opportunity

\$100B+ TAM: Global Productivity	\$14.3B SAM: Productivity Apps 2025	\$500M SOM: ADHD/Student/Freelancer
--	---	---

Competitive Advantage

Competitor	AI Decomp	Emotional	Neuroscience	Focus Mode
Todoist (35M+)	No	No	No	No
Notion (30M+)	No	No	No	No
TaskFlow AI	Yes	Yes	Yes	Yes

Business Model

Revenue Projections

Year	Users	Paid %	ARR
Year 1	50K	5%	\$300K
Year 2	250K	8%	\$2.4M
Year 3	1M	10%	\$12M

Investment Ask

Seeking: \$500,000 Seed Round

Use of Funds	%	Purpose
Product Development	40% (\$200K)	Mobile apps, AI improvements, team features
Marketing & Growth	30% (\$150K)	User acquisition, ADHD community building
Infrastructure	20% (\$100K)	Scaling Azure resources, security
Legal & Operations	10% (\$50K)	IP protection, compliance

POTENTIAL IMPACT

366M+

Adults with ADHD who need tools that actually work

MISSION

Help neurodivergent people actually DO the learning that only they can do for themselves.
